

CMI[™] 3000II VERSATILE & UPGRADEABLE

The **CMI3000II** is the latest generation of MIG/ MAG welding machines. Combining simplicity with state-of-the-art technology, the **CMI3000II** is a versatile, upgradable MIG/MAG welding machine using flash-card and inverter technology. The digital intelligence in the Car-O-Liner **CMI3000II**, 400V makes it easy to find the program relevant to the individual car make, even those

in hardenable aluminium. And since the joining of special alloy thin plates requires a gentle process this has been built into the memory of the **CMI3000II**. The results speak for themselves; the corrosion and strength properties of the material are maintained and only little post-treatment is required owing to a minimum of weld spatter and heat input.

SIMPLICITY AND STATE-OF-THE-ART TECHNOLOGY

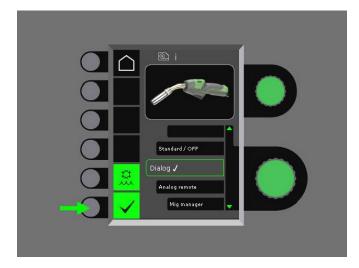

CMI3000II IS PERFECT FOR MODERN CAR BODY WORK WHERE HEAVY DEMANDS ARE PLACED ON THE SHOP TO CONTINUALLY ADJUST THEIR PROCESSES TO ENSURE HIGH QUALITY WELDING OPERATIONS.

PROCESS IMPROVEMENT - LESS POST-TREATMENT

The **CMI3000II** has been developed for use in light industrial applications, and for modern car body work where heavy demands are placed on the shop to continually adjust their processes to ensure high quality welding operations. MIG brazing high-tensile steel is a specialty of **CMI3000 II**.

DESIGNED TO MEET

PROGRAM WIZARD[™]

The **Program Wizard** is a built-in guide in the control panel which allows the welder to find the right welding program for an assignment without having to browse through all available programs. There is no risk of making wrong choices. By asking three or four simple questions, for example about the type of wire and gas, the **Program Wizard** will guide you to the appropriate program for your job.

LOWER POWER CONSUMPTION — SMALLER ENVIRONMENTAL FOOTPRINT

CMI3000II is environmentally friendly owing to new welding technology and use of low-energy components. An important factor now that CO_2 emissions and increasing power consumption are important in regards to our environmental footprint.

THE RESULT SPEAKS FOR ITSELF

The corrosion and strength properties of the material are maintained and only little post-treatment is required owing to a minimum of weld spatter and heat input. And, there is hardly any deformation of car body plates.

REMOTE CONTROL WITH MIG-A TWIST®

CMI3000II comes with the **MIG-A-Twist** torch in an award-winning design. The unique, turnable swan neck of the **MIG-A-Twist** allows access to hard-to-reach places. It is possible to mount different modules on top of the torch for adjustment of the most important welding parameters.

QUATTRO PULSE

The **CMI™3000II** is equipped with the revolutionary **Quattro Pulse** which enables the welder to produce the optimum droplet pinch off of the wire. This is particularly important when welding thin materials as it keeps the heat imput to a minimum consequently maintaining the strength and anti-corrosion coating of the steel while at the same time producing a tig-like weld.

MIG BRAZING

Many years of close cooperation with leading car manufacturers has resulted in a wealth of experience in the joining of special alloyed steels. MIG brazing with the **CMI3000II** is the perfect choice when welding galvanized and high strength steels as this method allows for the maintenance of anti-corrosion coatings and structural strength.

FEATURES AND BENEFITS

- **TRUE SPRAY PULSE FUNCTION** will not damage heat sensitive materials like aluminum or galvanized steel
- UPGRADEABLE, transfer of machine software and latest features by SD card free download
- PULSE AND QUATRO PULSE modes for heat sensitive materials
- **DESIGNED FOR THE FUTURE** to meet coming demands for materials and gas combinations
- LARGE, USER-FRIENDLY CONTROLS allow technician to focus on welding
- ERGONOMIC, adjustable welding torches for easy access
- PUSH-PULL TORCH for large operating range
- VARIETY OF WIRE DRIVE ROLLS for all types of wire
- **TWO TORCHES** Dialog and sequence torch

PROCESS IMPROVEMENT GIVES LESS POST-TREATMENT

PRODUCT INFORMATION

STANDARD COMPONENTS

CMI3000II 3 × 400V

Programmable for GM/PSA ML240, Twist R, 4m, 1.0 ALU nozzle

Part No. 34556

CMI3000II 3 × 230 - 500V

Programmable for GM/PSA ML240 Twist R, 4m, 1.0 ALU nozzle (Configured with autotransformer)

Part No. 34558

OPTIONAL ACCESSORIES

ALUMINIUM WIRE

ITI	EM	PART. NO.
AIMg 5 1.0mm 2kg		35178
AIMg 5 1.0mm 6kg		34344

GALVANIZED WIRE

ITEM	PART. NO.
SG1 0.8 mm 5kg	34345
SG1 0.8 mm 15kg	34346

MIG-BRAZING WIRE PSA

	ITEM	PART. NO.
CuAl 8 1.0mm 5kg		34049

MIG-BRAZING WIRE GM

ITEM	PART. NO.
CuSi 3 1.0mm 5kg	34202
Gas regulator 30L	34203
Adapter for 5kg reel	33509

TECHNICAL DATA

CMI3000II

L

SPECIFICATION	PARAMETER
Input voltage	230V 50 - 60Hz 1ph
Fuse	16A
Effective mains current	20 - 160A
Current range DC	90V
Duty cycle 100% at 20°C	300A
Duty cycle 100% at 40°C	270A
Duty cycle 80% at 40°C	300A
Open circuit consumption	40W
Mains voltage max.	18.1A
Efficiency rate	0.85
Power factor	0.90
Open circuit voltage	69 - 76V
Application class	CE, S
Protection class	IP23
Norm	IC60974 -1, -2, -5, -10
Dimensions	92.5×52.4×90.6cm (36.4x20.6x35.6in)
Weight (incl. supply cable)	58kg (127lb)

WE CARE ABOUT BODY SHOPS

EXCELLENCE. INNOVATION. PASSION.

CAR-O-LINER ACADEMY

We are a competence development partner for the automotive industry, our main objective is to improve quality, safety and profitability for body shops.

We enhance our customer's abilities by identifying the real competence and development needed. Offering solutions to meet these needs and accelarate the business growth.

WE OFFER THE SOLUTION

TRAINING

WE FIX THE ROOT OF THE PROBLEMS

WE MEASURE RESULTS

CUSTOMER SUPPORT

The Car-O-Liner Group headquarters is located in Gothenburg, Sweden, with subsidiaries located in Norway, Germany, France, United Kingdon, Italy, China, India, United States, Thailand and Middle East.

Wherever you are, Car-O-Liner can provide customer with product information, training, support or data subscription/renewal.
